more games as this please. superfun in local with friends. Casual, match 3 game, fairly easy and fun. I completed everything in the game in 14 hours, so there's that. What should be mentioned is that, for whatever reason, HD is not available even though I have a good pc, and that one of the achievements you basically need to get very lucky 8 times. Outside of those little things, I definitely recommend it. It's fun and relaxing.. This game is absolutely beautiful in every single way. The visuals are absolutely breathtaking, and almost every scene looks like a piece of art. The sound effects for each movement are perfect, and the music is wonderful. I enjoyed the gameplay as well. The platforming is quite easy, but the new abilities and atmosphere requires thinking and strategy. Every time I felt lost, or didn't know where to go, the game ended up leading me where i needed to be. The game is a bit more slow paced, but I personally enjoyed it because it felt relaxing. If you are looking for an intense platforming game, this is not it. However, if you are looking for a puzzle/exploration game that is pleasurable to your eyes and ears and tells an incredible story, I highly recommend. While the software itself and its assets are great, there is a huge problem with the license of its contents.

I purchased this software because it said we could use its results for our 2D games. Unfortunately, and to my knowledge it is still unclear to non-users willing to purchase, the software as of now only authorizes usage of its contents for "RPG Maker".

What does that mean?

It means that you won't be able to use Character Hub production for your 2D Games, not in any way.

At least if you are not a pixel art designer. And if you are a pixel art designer, I wonder what use could be Character Hub to you as you would combine your tiles and sprites on Photoshop for about the same results.

The game description says that "the elements found in the program should work with other 2D game engines as well." As of now it adds that "RPG Maker assets are for RPG Maker use only". But even some months after, the software only contains assets from RPG Maker! This means that you cannot use it in any game of yours, unless you make a RPG-Maker-RPG. I've googled for other 2D resources for Character Hub to no avail. If you know any legal resource library that we may use for our own games (and not something restrictive like RPG Maker), please tell!

The software should be renamed as "Character Hub for RPG Maker" ; as of now, although a very nicely made software, it ends almost as a scam for programmers willing to use it for their own games. It's very unfortunate as I am sure Character Hub programmer, an indie, has worked on this software, but it needs clarification and efforts to get some license-free resources.

. this is very good buy the bundle. I feel reborn

Abosolutely fun. Need 100% concentrating after the 30 point. Its a time killer, if your looking for something casual.. One of the deepest. coolest strategy games ever.. It is so boring~It took me some time to play this game, but I think this game is too single.. Achievement Lurker: Another one bites the dust is literally just an achievement earning machine, much like it's predecessors Achievement Hunter: Begins and Cromulent. This one boasting 5000 achievements.

I bought this game for one reason, achievements. I didn't buy it to play, or because I wanted it to be challenging. People complain about getting acheivements for doing nothing, 5000 achievements, it's called Achievement Hunter, what were you expecting? You know what you're going to buy.

For people like me that want cheap crap to collect achievements, it's a fantastic game and is exactly what I was looking for. Most of the time I just let the game run while I wander off and do other things, it couldn't be any easier.

But if you are only looking for an easy way to get some cool achievements, whether it's to display them, use them to spell things, make your profile look nice, or just get a high count, these games designed to do that and just that.. While the game may have a limited amount of content upon release, it has great potential. Being a direct competitor to Onward, this game offers matches where you ACTUALLY get to play more, without the need to wait for the next round once dead. With the addition of voip and maybe a few changes to the movement mechanic, this will be a go-to VR shooter. This game also runs great, even on my under powered machine running a gtx770 (unlike onward).. this game is sh#% i played for a few minutes and quickly realized it was worth nothing. Game concept is good the sport is awsome. Graphics need some wark as well as the controller support. My Xbox contrtroller does not work but my Steam controller does. The price is right at 5 bucks. Like the sport the moves are important to master. Good game but not for all. If you like the sport it is a great addition to your library.. Its a card game first, and a fighting game second. Each fight is structured by the cards played. And by 'cards', I mean a 52 card deck.

Your attacks come in the form of stacks of five such cards. Following Yahtzee Croshaw and Poker rules, getting say, a 5-of-a-kind will increase the damage that can be dealt.

The end all goal, of course, is to slay whoever you're fighting. Artwise its beautiful, but the lore of the game is handed to you via text, and wayyyyy too much of it.

8/10
